

DO YOU SMOKE TOBACCO CIGARETTES?

The Nicotine Dependence Clinic at CAMH invites women who regularly smoke tobacco cigarettes to participate in a brain imaging study.

This research will investigate the effects of menstrual cycle phase on brain activity and reward anticipation using functional magnetic resonance imaging (fMRI).

You may be eligible to participate if you are:

- **A woman with regular menstrual cycles**
- **Aged 18 to 30**
- **Able to attend one assessment visit (2 hours) and two study visits (3 hours each) on weekdays**
- **Not pregnant, trying to conceive, or breastfeeding**

Compensation provided
