

# Participants Needed for Clozapine Study

REB # 006/2014 **Principal Investigator: Gary Remington**

We are currently seeking people to take a part in a study investigating the relationship between levels of clozapine in the blood, treatment response, and side effects.

The study will involve one visit (plus possible follow-up visits) and includes a brief interview, blood work, measuring blood pressure, height and weight.

Persons eligible for a screening interview must meet the following criteria:

- 18 years of age or older
- Diagnosis of Schizophrenia or Schizoaffective Disorder
- Taking only clozapine as an antipsychotic for at least 3 months
- Stable clozapine dose for at least 1 week
- Able to communicate in English

Financial compensation provided.

If you are interested in participating, please contact the number below:
